Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a student preparing for exams and studying new topics	quickly understand concepts and check my own understanding	textbooks and scattered online resources are slow to search, and there is no easy way to self-test on a specific topic	most learning platforms are static content repositories that don't adapt to what I'm currently studying	overwhelmed and unsure whether I'm actually ready for my exams
PS-2	a self-learner exploring a new subject on my own (e.g., SQL)	find a clear, structured path from beginner to advanced level	content is scattered across many websites with no guided sequence or progression	there is no single tool that maps out a personalized, staged learning roadmap	directionless and unsure what to study first, next, and later
PS-3	an educator preparing material and assessments for students	quickly generate practice questions and simplified explanations for a topic	creating quizzes and summarizing material manually takes significant time	existing tools are either too generic or require heavy manual effort to adapt to a specific topic	time-pressured and limited in how much personalized content I can prepare
