Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool that helps teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it.

Persona: Student / Self-Learner using EduGenie

Think & Feel • Am I actually understanding this, or just reading it? • I hope I clear my exam / assessment with confidence • I wish studying felt less overwhelming	STUDENT / SELF-LEARNER	See • Multiple scattered websites and videos for the same topic • Classmates using different study apps and tools • Long textbook chapters with no quick-reference summary
Hear • “Just Google it” from friends when they have a doubt • Teachers say to “practice more questions” without pointing to any • Peers recommend random YouTube channels for explanations	STUDENT / SELF-LEARNER	Say & Do • Searches multiple sites/videos for one simple doubt • Re-reads notes passively instead of self-testing • Follows an unstructured, ad-hoc study plan
Pain • Time lost switching between multiple tools and tabs • No instant way to clear a doubt or check understanding • No clear roadmap of what to study next	STUDENT / SELF-LEARNER	Gain • Instant, accurate answers with context • Quick self-assessment through generated quizzes • A clear, staged learning path and concise summaries
