Customer Journey Map:

A customer journey map visualizes the stages a learner moves through while using EduGenie, capturing their actions, touchpoints, and emotions at each step so the team can design a smoother, more supportive experience.

Stage	Awareness	Onboarding	Doubt Clearing (Q&A)	Self-Assessment (Quiz)	Continued Use
Actions	Discovers EduGenie while searching for a faster way to study	Opens the app and explores the Q&A, explain, quiz, summarize, and learning path features	Types a question about a concept and receives an instant answer	Selects “Generate Quiz” for a topic to self-evaluate understanding	Returns regularly to clear doubts, summarize notes, and track learning progress
Touchpoints	Web interface, peer/instructor referral	Landing page and feature navigation menu	Q&A input box and response panel	Quiz generation module	Full application across all modules
Emotions	Curiosity, hope for a simpler study tool	Wants clarity on what the tool can do	Relief at getting an instant, accurate answer	Slight anxiety before testing, confidence after	Trust and reliance on EduGenie as a study companion
Opportunities	Highlight core features clearly on first visit	Keep onboarding minimal — no login friction for core features	Add brief educational context alongside every answer	Offer instant feedback and explanations for wrong answers	Introduce progress tracking and learning path reminders
