Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem, helping identify behavioral patterns and recognize what would work and why.

1. CUSTOMER SEGMENT(S) • Students preparing for exams • Self-learners exploring new subjects independently • Educators creating practice material	6. CUSTOMER CONSTRAINTS • Limited study time between classes/work • Access only to resource-constrained personal devices • Dependence on internet connectivity for cloud AI	5. AVAILABLE SOLUTIONS • Manual web searches and YouTube videos • Static textbooks and PDF notes • Generic chatbots not tailored to structured learning
2. JOBS-TO-BE-DONE / PROBLEMS • Clear a doubt instantly while studying • Understand a difficult concept in simple terms • Self-test understanding before an exam • Get a clear roadmap for a new subject	9. PROBLEM ROOT CAUSE • Learning resources are fragmented across many sources • No single tool adapts content to the learner's current topic and level	7. BEHAVIOUR • Searches multiple sites/videos for one doubt • Re-reads notes passively instead of self-testing • Follows an unstructured, ad-hoc study plan
3. TRIGGERS • An upcoming exam or assignment deadline • Encountering a confusing concept while reading • A classmate mentioning a faster way to study	10. YOUR SOLUTION • EduGenie: a lightweight AI assistant offering instant Q&A, concept explanations, quiz generation, summarization, and personalized learning paths through one interface, running efficiently on constrained hardware	8. CHANNELS OF BEHAVIOUR • Online: search engines, YouTube, study forums, EduGenie web app • Offline: textbooks, printed notes, peer discussion
4. EMOTIONS: BEFORE / AFTER • Before: overwhelmed, uncertain, time-pressured • After: confident, clear on next steps, in control of learning
